SUMMARY

Motivated 6th-semester Software Engineering student actively seeking an internship to apply academic foundations to real-world projects. Proficient in algorithmic problem-solving, writing clean code, and building robust software. Deeply passionate about Artificial Intelligence (AI), eager to contribute technical skills to a collaborative team while learning from seasoned professionals.

EDUCATION

Capital University of Science and Technology

Islamabad

Bachelor's in Software Engineering

Sep. 2023 – Jul. 2027

- **Relevant Coursework:** Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Engineering, Software Construction & Development.

Punjab Group of College

Faisalabad

ICS

Aug. 2021 – Apr. 2023

Projects

RoamEase (Travel & Expense App) | Java

- Built a Java application that helps users plan their travel routes and track the money they spend on trips.

Unity Racing Game | C#, Unity Engine

- Created a 3D racing game using the Unity Engine.
- Wrote C# code to make the cars drive realistically and respond well to the player's controls.
- Make sure the game runs smoothly with high frame rates on normal computers.

Rental System (Cars, Books, Tools) | HTML, CSS, Python(flask)

- A full-stack web application built with clean software design principles to easily manage equipment and asset rentals.

Multi-Factor Authentication | Python

- An information security application that protects user accounts using secure password storage and two-step verification (Email OTP and Authenticator Apps).

Medical Research Database | PHP, CSS, MySQL

- A full-stack web application built with clean software design principles to easily manage equipment and asset rentals.

AI-Powered Bid & Proposal Engine | Python, FastAPI, ChromaDB, LLM APIs

- Built an application during the CUST Hackathon 2026 to automatically generate text responses for project bids.
- Used FastAPI to set up the backend and integrated ChromaDB to store and search through project data.
- Connected Gemini and Groq APIs using OpenRouter to process the data and write the final proposals.

StudyAI (AI Learning Platform) | React, Node.js, Express, MongoDB, Groq, Google Gemini

- A full-stack AI-powered educational platform that leverages Large Language Models to provide an interactive AI tutor, dynamic quiz generation, and automated PDF assignment grading with personalized feedback.

CERTIFICATES & AWARDS

Introduction to Generative AI Learning Path | [Coursera](#)

Google AI Professional Certificate | [Coursera](#)

Hackathon Participant | [CUST Hackathon 2026](#)

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, JUnit, FastAPI

Developer Tools: GitHub, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Unity Engine, Figma
